

MAC FTP Upload Instructions using Cyberduck

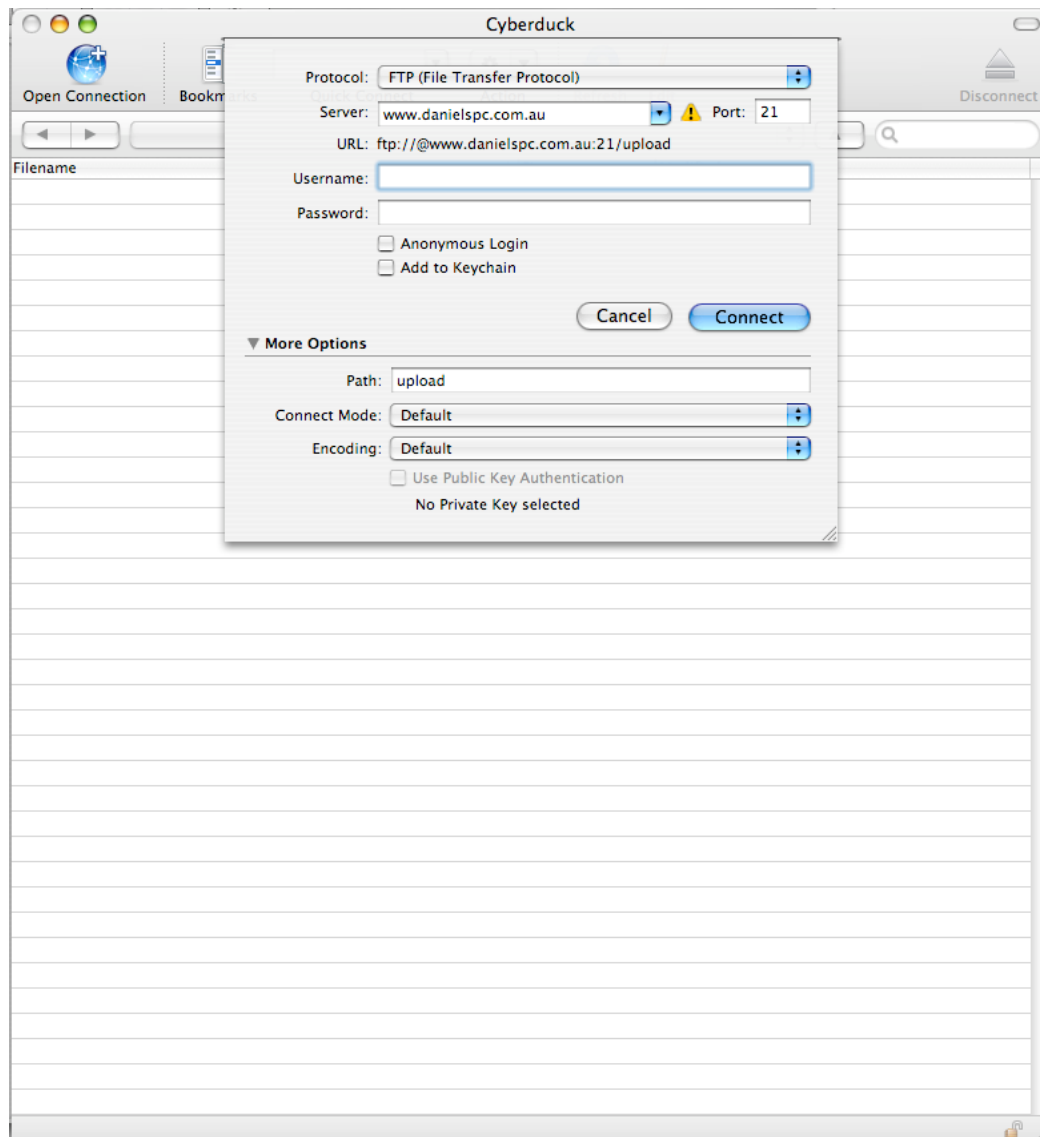

Overview

This document provides step-by-step instructions on how to upload files to the Daniels FTP site, to be collected by Pre-press, using an Apple MAC and the Cyberduck FTP Upload program.

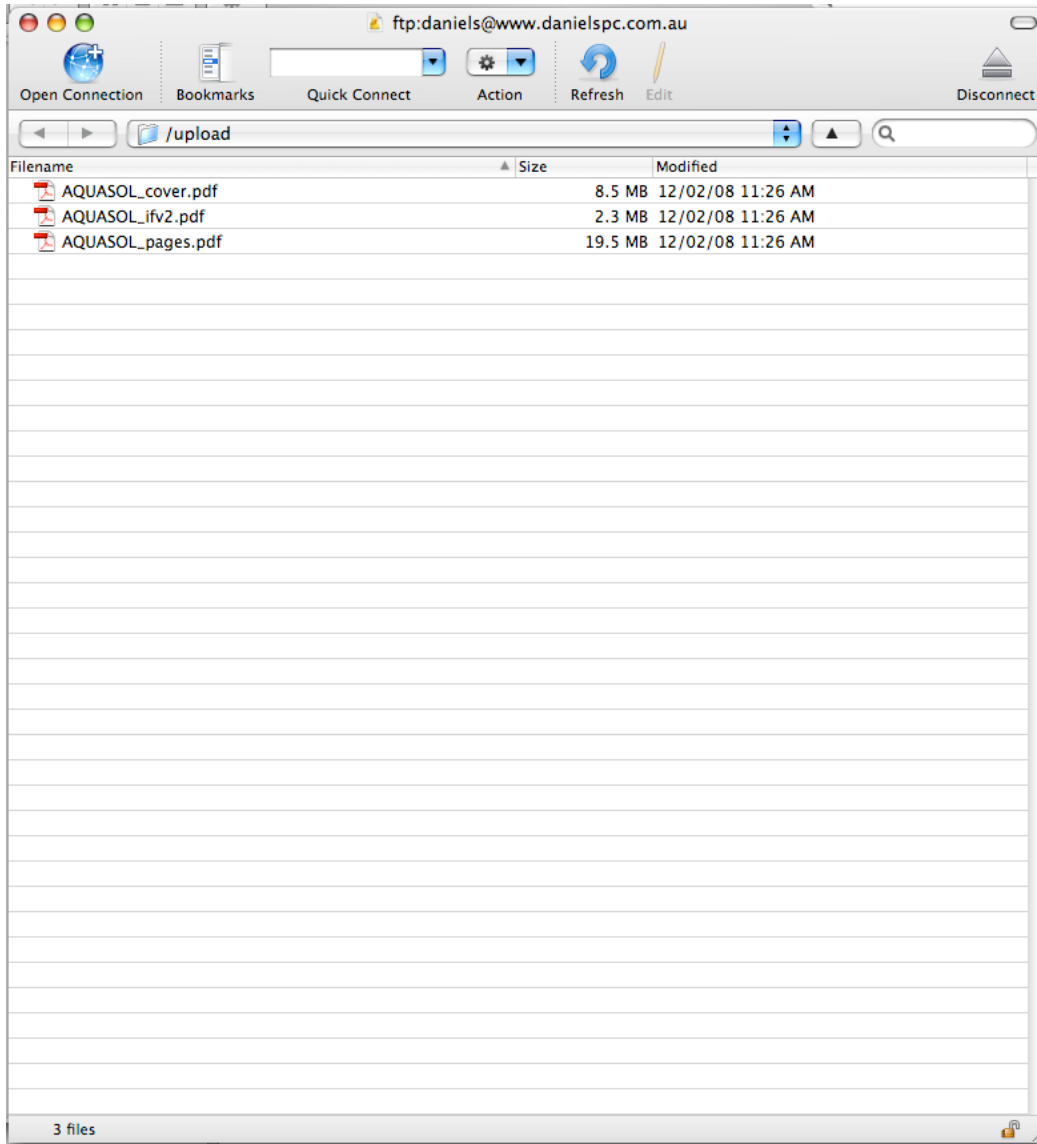

Although Cyberduck is being used in this case, the settings can be applied to any available FTP Upload program and used in a similar fashion.

Instructions

1. Download and install [Cyberduck](http://www.apple.com/downloads/macosx/internet_utilities/cyberduck.html) from:
http://www.apple.com/downloads/macosx/internet_utilities/cyberduck.html
2. Open [Cyberduck](#) and from the application click the [Open Connection](#) button.
3. Enter the settings as shown in the screenshot below, along with the [Username](#) and [Password](#) supplied by email or Daniels contact and click [Connect](#).

4. It is then simply a case a dragging and dropping your artwork files into [Cyberduck](#), which uploads them to the FTP site. On uploading, the files should appear in the FTP site as shown in the screenshot below.

Troubleshooting

In the event of any issues or questions, please contact the Pre-Press department on Daniels 08 9204 6800 for assistance.
